

LightSail® Offline Mode

LightSail allows students to read in Offline Mode when a Wi-Fi connection is unavailable.

In order to access LightSail in offline mode, two conditions need to be met:

1. First, you must already have a book checked out. While you are connected to Wi-Fi and logged into LightSail, check out the desired book by tapping on **Read**.
2. Secondly, you must have previously logged into LightSail on the iPad that you wish to use in offline mode.

LightSail will automatically adjust to Offline Mode if it does not detect a network connection, and will allow you to continue reading seamlessly. Upon connecting to Wi-Fi, all of your reading progress and assessment data will be updated in real time.

You can also go to lightsailed.com/offline-mode to watch a short video explaining this new feature.

If you have any issues reading with Offline Mode, please visit lightsailed.com/support and tell us about your issue.
