

LightSail Early Release Installation - Chromebook

I. TO DOWNLOAD LIGHTSAIL DIRECTLY ONTO YOUR CHROMEBOOK:

- Open the **Chrome browser** on your Chromebook and visit <http://bit.ly/lis-chrome>
- Once the page loads, click **"Add to Chrome"**
- LightSail will begin installing. You may see two downloads occur because LightSail requires the **App Runtime for Chrome (ARC)**, which will begin to automatically install if it has not been previously installed.
- After a few minutes, press the **Search key** (magnifying glass) and then click **"All Apps"**. LightSail has finished installing once you see the LightSail icon appear.

II. TO PUSH LIGHTSAIL TO YOUR CHROMEBOOKS USING THE CHROME MANAGEMENT CONSOLE:

- Be sure that your devices' security policies do not restrict **private** apps or extensions.
- LightSail app ID: **iipfahgfceciegnodpabopdjhkpdddeo**

If you are having difficulty installing, please confirm the following details:

- Does your device's security policies permit private apps/extensions to be installed? The early release version of LightSail for Chrome is not yet publicly available on the Chrome Web Store.
- Are the following app/extension IDs approved by your device's security policies?
 - App Runtime for Chrome (ARC) ID: **mfaihdlpglflfgpfjcfidjdjckigekc**
 - LightSail ID: **iipfahgfceciegnodpabopdjhkpdddeo**
- Has your device been updated with the latest version of Chrome OS?

If you have trouble installing LightSail after confirming the above details please email support@lightsailed.com or call our support line at 866.876.7323, option 1.
